

Practice Goup Banking & Finance

Our practice group advises companies, credit and financial institutions and public institutions on all aspects of banking and financing law. We place great importance on building relationships based on trust and provide comprehensive, personalized support. The expertise of our practice group Banking & Finance covers the entire spectrum — from drafting and negotiating contracts to preparing legal opinions and representing clients before authorities, courts, and arbitral tribunals.

Our specialist fields

Banking Transactions and T&C

We draft and review contractual terms and conditions for financial institutions in accordance with current legal requirements, developing legally sound and practice-oriented solutions for payment services.

Loan Law and Credit Security

Loan agreements require trust and diligence. Based on your individual risk strategy, we prepare and review tailored contracts and supplementary agreements, determine appropriate collateral, and ensure its efficient realization when necessary.

Securities Law

With our expertise, you can stay on top of statutory disclosure and information obligations and avoid liability risks in advance. We also assist in defending against alleged claims arising from purported investment advice failures.

Payment Services

We provide guidance on all questions relating to licensing requirements, rights and obligations in the provision of payment services, and compliance with the consumer protection provisions of the Austrian Payment Services Act 2018 (ZaDiG 2018).

Banking Supervision Law Regulatory Matters

We advise on the interpretation, application, and implementation of regulatory provisions under banking supervisory law.

Money Laundering

Globalization, digital business models, and cross-border payment flows have made financial transactions more complex, faster, and less transparent. Together, we help you meet the growing compliance and due diligence requirements effectively.
